

TOSHIBA RIBBONS

Overview

- > Toshiba ribbons are available in various grades to suit virtually any application in every market, from mass-produced short-term label printing and RFID tags, up to highly specialised identification techniques using advanced resin products.
- > Using Toshiba ribbons ensures optimum print quality causing minimum wear on working parts – in particular to the printhead.
- > Designed and manufactured to truly demanding industry standards, there is no better choice: Toshiba consumables – helping create a better image

OUR BRAND IS YOUR GUARANTEE

The perfect fit for superior image quality

Every day Toshiba thermal transfer ribbons are relied on by businesses the world over to produce vital labelling for a huge variety of applications. Our ribbons are available in various grades to suit virtually any application in every market, from mass-produced short-term label printing and RFID tags, up to highly specialised identification techniques using advanced resin products.

Choose the perfect ribbon for your application.

- > Resin Premium
- > Resin Standard
- > Wax Premium
- > Wax Resin
- > Wax Standard

By using Toshiba ribbons you not only ensure excellent print quality, you also minimise wear on working parts - especially to the print head. Has there ever been an easier way to improve your ROI?

As one of Europe's biggest thermal transfer ribbon suppliers, we are committed to quality and reliability to help your business grow. Designed and manufactured to truly demanding industry standards, there is no better choice.

Before a ribbon is certified by Toshiba it must first undergo stringent tests to ensure its continuity and reliability in the field. It is assessed on a variety of receiving materials, and at every speed and temperature combination. Only once this procedure is complete and deemed successful will the ribbon receive its certificate of approval.

Like all our products, our consumables, too, are designed to improve printing efficiency, while at the same time reducing packaging waste and minimising delivery and transportation costs. This not only saves you money, but also helps create a greener tomorrow.
